PROFESSIONAL SUMMARY

Software Engineer with **2+ years of experience** in building **scalable ETL frameworks**, optimizing **big data pipelines**, and automating **cloud-native solutions** in **banking and financial services**. Skilled in **Python, Spark, Big Data Modeling**, and **Azure**, with proven success in improving efficiency, developing **automation tools**, and delivering **AI-driven data compliance solutions**. Currently seeking opportunities at the intersection of Big Data and AI to build intelligent, scalable, and data-centric systems.

TECHNICAL SKILLS

Languages: Python, Javascript, SQL, Java

Technologies: Apache Spark, Hadoop, React, Hive, SQL Server, Autosys, S3, Apache Iceberg, MongoDB, LLM, TIG monitoring

Frameworks : Spark, Flask, FastAPI, Pytorch, React, Kafka, LangChain, LangGraph, MCP

Tools: Azure, Informatica, Docker, Git, Postman, Copilot, Jenkins

Certifications: [Azure AI Engineer Associate\(AI102\)](#), [Azure Fundamentals\(AZ900\)](#), [Azure AI Fundamentals\(AI900\)](#)

EXPERIENCE

Data Engineer, AVP

May 2026 – Present

HSBC

Bangalore

- Building an MLops Data Platform to streamline and organise ML process and data discovery across all asset classes.
- Working on AI/ML initiatives in Global Markets.

Software Engineer, AVP

Jan 2023 – May 2026

Wells Fargo

Bangalore

- **Built a modular ETL framework in PySpark** to ingest and process **20GB+ daily financial liquidity data** for **FR 2052A** reporting from **S3, Oracle, and SQL Server** into **Iceberg tables**; **automating reconciliation of \$50B in reporting adjustments**; implemented **dynamic schema handling, incremental loads, and lineage tracking**, reducing manual documentation work.
- **Improved pipeline efficiency by 73%**, cutting execution time from **45 to 12 minutes** through **performance tuning, multiprocessing, and query optimization**.
- Developed an **Informatica ETL XML automation tool**, reducing manual effort by **60%+**; **adopted across teams**, presented to the **CFO and CIO of Finance Tech**.
- **Designed a cloud-native big data model**, migrating **legacy Oracle DBs** to a **distributed data lake built on S3, Iceberg**; optimized **partitioning, and caching** with **ACID compliance** and **schema evolution**.
- Developed an **asynchronous Python automation script** to execute and monitor multiple **AutoSys job boxes**, streamlining the **UAT environment refresh process** by polling job statuses in parallel and sending **real-time failure alerts**.

PROJECTS

Google Summer of Code

Jun 2022 – Sept 2022

Red Hen Lab

Remote

- Automated Tagging pipeline with **87% accuracy** of Medieval art for Christian Iconography using **Computer-Vision techniques**.
- Worked on several DL and ML models like **Word2Vec, ResNet50, YOLO, EfficientNet, Pose Approximation**.
- GitHub repository - [Christian Iconography Blog](#) - [Christian Iconography](#)

EDUCATION

Manipal Institute of Technology

Bachelor of Technology in Computer Science, Minor in Big Data Analytics - CGPA 9.13

Manipal, Karnataka

Jul. 2019 – Jul 2023
